

## Modern Landfill Website Now Live

October 8, 2020

**YORK, Pa. (Oct. 8, 2020) – Learn more about our current operations and plans for the future, and contact our site team directly with questions.**

Modern Landfill has been part of this community for nearly 50 years. We're grateful for the strong relationships we've built over the years, particularly with our neighbors, which is why we're reaching out to provide you with an update about our current operations and plans for the future.

Our local team of environmental managers, engineers and scientists are committed to being good neighbors and operating with environmental practices and policies that are good for the community, our customers, local businesses and residents. Modern Landfill is highly engineered to meet or exceed state and federal regulations, with environmental protection as a top priority.

As critical infrastructure --- and to ensure that safe and environmentally responsible waste disposal services continue for commercial, residential and industrial customers in central Pennsylvania and neighboring communities --- we are proposing a 124-acre expansion on land east of Mount Pisgah Road. Modern Landfill's current 227-acre disposal footprint will reach capacity within five years.

Modern Landfill has enabled progress and development for decades, and working together, as good neighbors should do, we hope to ensure our facility will continue to enable prosperity and environmental stewardship for generations to come. Learn more about our proposal and ways to contact us directly at <https://modernlandfillpa.com/>
