

## Investing in Our Communities

November 22, 2022

### **Modern Landfill donates \$50,000 to Windsor Township, Yorkana Borough**

**YORK, Pa. (Nov. 22, 2022)** – Modern Landfill has been part of this community for more than 50 years, which is why we invest locally to ensure our neighbors have the resources they need for projects that will make life better for individuals and families.

We recently donated \$30,000 to Windsor Township for its Windsor Wonderland rehabilitation project at Freysville Park, and \$20,000 to Yorkana Borough for a sidewalk restoration project.

#### **Both investments fund community projects that had been rejected for grants through other state and local programs.**

Yorkana will use its \$20,000 grant to repair sidewalks in the borough. The borough previously sought a block grant from York County but was denied.

In Windsor Township, the \$30,000 grant will help to fund renovations to replace existing playground equipment while adding a rain garden and new stormwater controls to prevent flooding at the park.

The current playground, which provides children with a place to exercise and play, was built in 1997. Not only is the equipment dated, but it has become increasingly difficult for the township to find replacement pieces when items break or are damaged. The township applied for a grant from the Pennsylvania Department of Conservation and Natural Resources in 2020 but was not selected.

Being a good neighbor means supporting one another – not only around the holidays, but all year long. We're pleased to provide this funding and look forward to how these investments will help to transform our communities.
